

## How does it work?

- Position your wheelchair
- Put on the breaks
- The top segment can now be removed
- Transfer safely and easily

## trivida® Advantages

- Safer transfer and reduced risk of falling out of the wheelchair during the transfer
- Safe use of sliding board
- User-friendly ergonomic handles
- Wheelchair stays safely positioned during transfer
- Less lifting, less strain on family, carers and nurses
- Patented medical product

trivida®  
Barrier-free living

## Greater independence and dignity.

Barrier-free transfer for greater independence and mobility in your day-to-day life.

trivida®  
Simply more  
of life.

„Previously I had to lift my wife from the wheelchair for every transfer. With the trivida® wheel she hardly needs any assistance when changing seats today. This is a great relief for me and my back.“

Gregor L., married to Erika L, who was left paralysed down one side following a stroke.

## Greater independence. Better quality of life.

trivida® is the world's first wheel that makes possible uncomplicated, obstacle-free transfers. It facilitates mobility in your everyday life. Daily transfers between wheelchair and bed, toilet or shower stool, couch, chair, stair lift or car seat require less energy and are therefore easier. By removing the obstacle of the wheel, it has further become much safer to transfer across, it is as easy as sliding over.

## Less strain. Greater mobility.

Do you experience the transfer as an energy sapping procedure, which might even trigger fear and worries? As soon as it has become too difficult to transfer, your solution is the trivida wheel. Even if you only need a wheelchair for a short period of time, the dividable trivida® wheel will be a great help.

## Less strain for family and friends

With trivida®, you become less reliant on assistance. In fact, depending on your level of mobility, you even manage the transfer entirely by yourself. A great relief for your loved ones. The trivida® wheel can help create a sense of fun and relaxation more often.
